Applicant's election without traverse of Group II-Figure 3, and in the reply filed on 3/18/2008 is acknowledged. Claims 1-10 read on the elected species.

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

The applicant's information disclosure statement dated 10/12/2004 has been considered and a copy has been placed in the file.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, line 6, the applicant states that "the second part defining a plane, and a normal line substantially perpendicular to the plane defined by the second part is inclined". This appears contradictory since something normal is perpendicular and then the applicant states that it's inclined. Furthermore, the applicant states in claim 2, that the incline is 45 degrees. Please provide clarity.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3634

As best understood, claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Dedrich et al., (5,855,095). As shown in detail below, Dedrich et al., (5,855,095) disclose having a first part connected to a guide rail which moves a window pane between an open and closed position, a second part fixed to the vehicle body (at 18) and having an oblong hole (22) for passage of a fixing member (34), and a bridge fitting (see figure below).
